

The FEMA Corporation logo consists of the word "FEMA" in a bold, black, sans-serif font, enclosed within a white oval that has a red border.

FEMA

Corporation

Exceeding Expectations

Comprised of the finest application, design, test and process engineers in the industry, FEMA can collaborate with you to bring your project from concept to production.

Leverage our successes from off-road mobile equipment, aerospace, automotive, stationary machinery, rough terrain sporting, medical devices and a wide range of other markets to ensure the success of your program.

Four electrohydraulic components are displayed in a row, each highlighted by a red oval. From left to right: a solenoid valve with a grey body and a black top; a solenoid valve with a white body and a black top; a manifold with a silver body and multiple ports; and a solenoid valve with a silver body and a black top.

FEMA Corporation: Your partner for any electrohydraulic challenges, including design, development, and validation of innovative, affordable, and differentiated solutions.

Electrohydraulic Solenoid Valves, Sectionals, Mono-Blocks, Manifolds and Circuits
